SUMMARY

Multimedia Design bachelor student with a strong focus on UX/UI design, web development, and digital content creation. Experienced in designing user-centered interfaces and creating responsive websites using modern design and development tools. I combine visual design with technical implementation to build intuitive digital experiences. Detail-oriented, highly motivated, and continuously improving skills in web technologies and interactive design, with a strong interest in innovative solutions.

EDUCATION

Bachelor in Multimedia Design

Sep 2022 - Jun 2026

VILNIUS TECH

- Designed UX/UI solutions for websites and mobile applications, focusing on usability, accessibility, and visual consistency.
- Worked on branding and visual identity projects, including logos, layouts, and marketing visuals for mock clients.
- Developed responsive web projects, integrating basic backend logic when needed.
- Collaborated on team-based projects, simulating real-world workflows, deadlines, and role distribution.
- Built a professional design and development portfolio, showcasing projects in web design, branding, and interactive media.
